

**CMAWA Major Sponsors Jan—July 2019**

**Welcome to the CMAWA Committee 2019**

<b>President</b>	<b>Frank Trichilo</b>	<b>Crown Cabinets &amp; Design</b>	<b>Balcatta</b>
<b>Vice President</b>	<b>Ugo De Laurentis</b>	<b>Delta Cabinets</b>	<b>Bayswater</b>
<b>Treasurer</b>	<b>Rebecca Stagg</b>	<b>Silverline Cabinets</b>	<b>Wangara</b>
<b>Secretary</b>	<b>Samuel White</b>	<b>Samuel Cabinetry</b>	<b>Wangara</b>
<b>Ordinary M.</b>	<b>Rodney Mills</b>	<b>Master Class Cabinets WA</b>	<b>Forrestdale</b>
<b>Ordinary M.</b>	<b>Mark Wood</b>	<b>Veejays Renovations</b>	<b>Malaga</b>
<b>Ordinary M.</b>	<b>Tony Casella</b>	<b>Style Side Cabinets</b>	<b>Malaga</b>
<b>Associate M.</b>	<b>Malcolm Brewer</b>	<b>Brewer Machinery</b>	<b>Wangara</b>

As voted in at our Annual General Meeting held on 20th March, we are fortunate to have the ongoing support from many of our Committee with two new on-coming members pledging their commitment, namely Tony Casella from Style Side Cabinets and Rebecca Stagg of Silverline Cabinets. Welcome both.

Acknowledgement and appreciation must go to Burke Franke of Franke Cabinets who held the position of Treasurer ongoing for the past several years yet due to other commitments decided it was time to step aside. Burke’s dedication and commitment to his role on the Executive Management team is well noted as was his support to the Committee as a whole and to the CMAWA.

The Treasurers duties will now be taken on by Rebecca Stagg Co-Director of Silverline Cabinets. Rebecca has a wealth of experience with financial management and book-keeping. This coupled with her passion and drive for the CMAWA makes a winning formula for a successful office.

I look forward to working with all Committee members throughout 2019 and offer my commitment in support of their endeavors. Sheila Payne, Executive Officer.

**Glowing Testimonial for Infinity Cabinetmaking**

Good news stories like this are very often held back so it was lovely to receive this feedback from Margaret via our website enquiry portal. Great work Sean and Nicole. Make sure you use this testimonial on your website and promotional.

Consumer Margaret 14 March 2019

*“ I have recently had a complete kitchen renovation through Infinity Cabinet-making. Sean Blackmore was an absolute professional and I cannot speak more highly of his amazing service and showmanship. From the onset I was impressed by his knowledge and personal touch which has continued through the entire process. Backed by his wife Nicole, who answered no end of queries from myself, they are a great team. Nicole was so patient and helpful and never tired of my silly questions.*

*I could not be happier with finished result and the whole process has been so easy”.*

**The Apprentice and Traineeship Company** and ATC Employment Solutions (ATC) is a “not-for-profit” group training and labour hire company providing services State wide in Western Australia. ATC delivers high quality staffing solutions across a diverse range of industries, and regardless of your size, we have a reliable and skilled workforce ready for hire.

With over 30 years’ experience in employment and recruitment we understand workflow needs. We can provide you with group training and labour hire solutions to suit your requirements. We employ the apprentices, trainees and labour hire workers and place them with you. We handle all the paperwork for wages, allowances, workers’ compensation, superannuation, etc. We are there throughout the period of placement to make sure everything runs smoothly. We are the extra layer of support for you. We free you up, so you can run your business!

When you take a placement through us, we will:

- advertise the position;
- interview, reference check and, in relation to apprentices and trainees, aptitude test;
- make recommendations of best candidates;
- arrange pre-employment medicals, if required;
- ensure the placements have required PPE;
- provide inductions;
- provide ongoing performance assessments for apprentices and trainees;
- be there regularly as a mentor, resolve issues and provide pastoral care to the apprentices and trainees to ensure they are focused on your business; and
- liaise with the relevant registered training organisation regarding their off-the-job training.

We offer a great service at a competitive price and over 450 business employ through our system.

**‘With Planit, it’s not just about the software, it’s about the solution’**

Since 1984, Planit Cutting Edge Solutions has been the leading provider of software solutions in Australia and New Zealand, servicing the woodworking industry. Our solutions help provide companies the tools to produce and sell goods such as cabinets and joinery for homes, offices, schools, and hospitals, as well as other commercial projects.

Our extensive portfolio assists businesses to streamline and improve their design to manufacturing systems, representing a complete Business-to-Business solution. Our solutions include design software for drawing and presenting designs to clients, interactive 3D presentation tools and advanced manufacturing software to control any CNC machine. Planit’s solutions are designed to help you overcome the bottlenecks in your business, with a solution that is best suited to your situation and your business. Planit’s solutions are integral to the success of thousands of companies Australia wide, from small to large and across every aspect of manufacturing. The unique way in which our solutions are integrated allows us to work very closely with our customers to determine the right solution to suit their individual needs.

With over 20 staff, Planit is a National company with the resources to provide the best possible solution to you. We have staff positioned right across Australia to ensure we service businesses right across the country.

**Cabmaster** offer many solutions to ensure we suit your needs! CabMaster Designer Range CabMaster Software starts with the Designer Range. This can have a cutting list and hardware list that goes along with your drawings. This range also includes Plans, Elevations and 3D Drawings.

CabMaster Software runs all current CNC machines with our Machining Range. We start this range with CabMaster Basic, an entry level package that lets you create a list of cabinets ready for CNC Processing. Then we go all the way to CabMaster Premium, which lets you create all your cabinetry needs from Design to Manufacture.

The CabMaster Software range starts with 3 x Design packages, from design only then to include a cut list and hardware report to being able to modify your library. The CabMaster Manufacturing range consists of 3 x different levels, from the most basic list view only, entry level package up to the complete 'Premium' package which is the top of the line, design to manufacturing package. Also included in the CabMaster product range are some specialty packages, such as ShapeMaster for ACP or BoxMaster for Box prototyping / manufacturing or DoorMaster for MDF Door manufacturing and more. **CabMaster Software - WA & SA Peter Hutson M: 0459 077 099 peter@cabmastersoftware.com**
